

Compatibility chart for Hifi or Standard Stereo sound system upgrades in combination with the UP 7BMW / DSP amplifier *

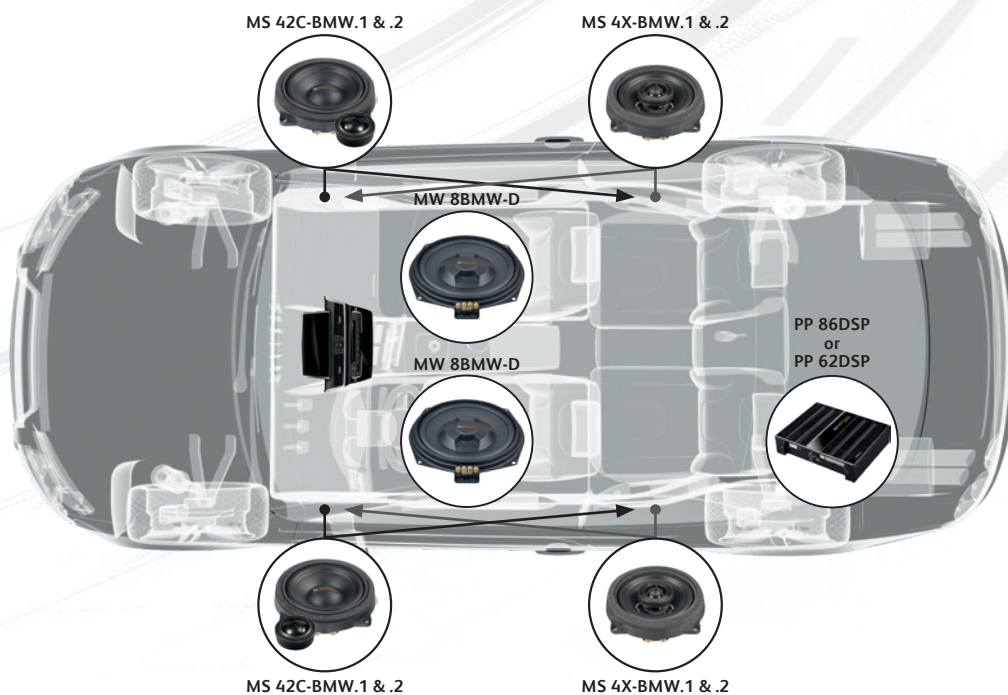

This concept allows to drive an optional center speaker due to the proprietary RealCenter algorithm.

The **UP 7BMW / DSP** amplifier should always be combined with the **UP W8BMW-S** under seat subwoofers to achieve maximum performance.

Compatibility chart for Standard Stereo sound system upgrades in combination with the PP 62DSP / PP 86DSP amplifier *

The **PP 62DSP & PP 86DSP** amplifiers should be combined with the **MW 8BMW-D** under seat subwoofers to achieve maximum performance.

Configuration recommendation:

An up-to-date list of vehicle compatibility can be found at www.audiotec-fischer.com

* The amplifiers are not compatible for models with RAM module (vehicles from 2019)
 ** Slight modifications of the installation place necessary.
